## Non-GAAP Financial Measures

We report our financial results in accordance with generally accepted accounting principles in the United States ("GAAP"). However, management believes that certain non-GAAP financial measures provide users of our financial information with additional useful information in evaluating our performance. We believe that adjusted EBITDA is frequently used by investors and securities analysts in their evaluations of companies, and that this supplemental measure facilitates comparisons between companies. This non-GAAP financial measure may be different than similarly titled measures used by other companies.

Our non-GAAP financial measure should not be considered in isolation from, or as substitutes for, financial information prepared in accordance with GAAP. Adjusted EBITDA has limitations as an analytical tool, and you should not consider it in isolation or as a substitute for analysis of our results as reported under GAAP. Some of these limitations are:

- Although depreciation and amortization are non-cash charges, the assets being depreciated and amortized may have to be replaced in the future, and Adjusted EBITDA does not reflect cash capital expenditure requirements for such replacements or for new capital expenditure requirements;
- Adjusted EBITDA does not reflect changes in, or cash requirements for, our working capital needs;
- Adjusted EBITDA does not consider the potentially dilutive impact of equity-based compensation;
- Adjusted EBITDA does not reflect tax payments that may represent a reduction in cash available to us;
- Adjusted EBITDA does not reflect certain non-routine items that may represent a reduction in cash available to us; and
- Other companies, including companies in our industry, may calculate Adjusted EBITDA differently, which reduces its usefulness as a comparative measure.

We compensate for these limitations by providing a reconciliation of this non-GAAP measure to the most comparable GAAP measure. We encourage investors and others to review our business, results of operations, and financial information in their entirety, not to rely on any single financial measure, and to view this non-GAAP measure in conjunction with the most directly comparable GAAP financial measure. For more information on these non-GAAP financial measure, please see the section titled "Unaudited Reconciliation of Net Loss to Adjusted Earnings before Interest, Taxes, Depreciation and Amortization (EBITDA)", included below.

Unaudited Reconciliation of Net Loss to Adjusted Earnings before Interest, Taxes, Depreciation and Amortization (EBITDA)

We define adjusted EBITDA as net loss excluding interest income, other (income) expense, net, provision for income taxes, depreciation and amortization, and equity-based compensation expense. The following table presents a reconciliation of net loss, the most comparable GAAP financial measure, to adjusted EBITDA for each of the periods presented:
